

SHAFT
ELEVATORS

About us

Our operation continuously seeks to advance manufacturing processes in our own modern facilities, allowing us to offer exceptional value and shorter lead times, while never compromising product quality, safety or reliability.

As an active member of many trade associations. Shaft is committed to the ongoing support of its customers and dealers alike. Authorized Shaft elevator technician are carefully selected for their knowledge and experience, kept up-to-date with the latest technical and training sessions,

Shaft is a leading designer and manufacturer of elevators. Our product lines include a complete line of luxury residential elevators, ADA compliant public elevators, commercial vertical platform lifts, residential wheelchair lifts and an automatic door opener. Shaft Elevator is dedicated to developing and manufacturing the highest quality elevator products that provide great value through accessibility and mobility solutions for people in their homes or commercial buildings.

Shaft Elevator has grown nationally, and is recognized as an industry leader for its innovative engineering and the quality of its products and customer service. Shaft's corporate headquarters and modern manufacturing facility produces the highest quality customer home elevators, commercial LU/LA elevators, a wide range of commercial platform lifts and home porch lifts.

At Shaft Elevator, our engineering expertise allows us the flexibility to meet the unique project requirements of building contractors, architects and homeowners as well as accommodate today's standard building sizes and configurations.

We thank you for taking the time to browse our website and are confident you will find a Shaft Elevator or Lift that will satisfy your requirements.

Our Services

We provide large varieties of elevators and lifts, which are precisely designed to move proficiently and work on high traffic load.

Shaft Elevators is well-known for its service. We undertake AMC (Annual Maintenance Contracts) for different kinds of elevators. Quality of service is associated to a passenger who has to wait for a while for an elevator car and our aim is to promptly and securely transport the passenger to his destination.

We Provide Several Types of Services : INSTALLATION, MAINTENANCE, REPAIRING, SPARE PARTS

We can also provide you with proficient advice on repairs and replacements as well as advice on keeping your forklifts operative and in service for your business.

Our turnkey services comprise of installation and efficient after sales services and are solicited by some of the foremost names in the industry.

Another initiative to ensure that we respond to all the complaints or queries quickly and efficiently.

More importantly we follow up with the customer till she/he is satisfied.

We assure the highest level of satisfaction to our clients in the concerned industrial sphere of lift maintenance services. These services are provided at the most viable prices and involve substitution of old lifts by the latest models of our elevators.

The availability and fast delivery of spare parts for wide range of equipment brands also allow you to convert rate on your business while we take care of your elevators and escalators.

Safety Features

Safety Features

AUTO RESCUE DEVICE

In the event of power cut off, the elevator will continue to operate till the nearest floor and open the doors to let passengers out safely.

INFRARED LIGHT CURTAIN

Full height infra red curtain with multiple cross crossing light beams detect the smallest obstruction in door path and stop doors from closing.

OVER LOAD SENSOR WITH AUDIO VISUAL INDICATION

On overloading of the lift, car audio-visual indication is provided and doors are kept open till excess load is removed.

EMERGENCY ALARM & "PUSH TO TALK"

In case of any emergency or power failure, help can be obtained by alarming or by communicating at lobby through this system which is battery operated and self charging as shown in picture.

SAFETY IN CASE OF OVER TRAVEL

Three phase electric power is disconnected from control panel and motor, the moment elevator car moves beyond the limit of top and bottom terminal floors causing immediate application of the brake to bring the elevator to halt.

CAR EMERGENCY LIGHT & FAN

The emergency light is always illuminated in normal condition and switches itself automatically to battery back up in case of power failure as shown in picture. (Block-D) also operates for minimum 20 minutes after power failure.

SAFETY IN CASE OF ROPE BREAKAGE

In the case of breakage of ropes, elevator speed exceeds the rated speed in the downward direction due to gravitational acceleration. the over speed governor activities the clutch mechanism thereby switching off main controls and jamming the elevator car safety on guide rails.

CAR FAN AUTOMATIC SLEEP

Car fan automatically stops when there are no registered floor calls resulting into saving in power and enhancing its life.

VOICE ANNUNCIATOR WITH MUSIC

This system provides detailed information to passengers related to next floor direction of movement, door opening/closing, scheduled operations and other information depending on the building needs. This system features natural electronic voice synthesizers.
